

BIRENDER SINGH

ENGINEERING & DELIVERY LEADERSHIP

PRODUCT-MINDED | PEOPLE-FOCUSED | OUTCOME-DRIVEN

SUMMARY

Senior delivery and engineering leader with 15+ years of experience leading complex, multi-team initiatives across modern data platforms, cloud, cybersecurity, and digital transformation. Proven ability to translate strategic intent into clear delivery roadmaps and drive execution in ambiguous, high-stakes environments.

Operates at the intersection of product, technology, and people, aligning stakeholder priorities, engineering execution, and ways of working to improve flow, quality, and predictability. Brings a pragmatic, people-focused leadership style with a strong bias toward outcomes over activity.

INDUSTRIES

Public Sector, Financial Services, Insurance

EXPERIENCE

Senior Principal Consultant - Slalom | Aug 2021 to Present

Senior client facing role in a consulting environment, trusted to step into complex engagements and provide clear, steady delivery leadership. Led both standalone initiatives and large multi stream transformations, taking accountability for outcomes and owning critical delivery streams within broader program structures.

Leadership & Delivery

- Led large scale initiatives across multiple engineering teams and product areas, owning end to end delivery including scope, dependencies, risk, and stakeholder alignment.
- Worked closely with executive and senior client stakeholders to shape delivery strategy, put fit for purpose governance in place, and support timely, well informed decision making.
- Aligned product priorities, engineering execution, and delivery planning, helping teams move forward with clarity, confidence, and quality.
- Introduced practical delivery frameworks and forums that improved flow, predictability, and transparency without adding unnecessary overhead.
- Built and led cross functional teams across engineering, data, QA, architecture, and operations, creating an environment of accountability, psychological safety, and high performance.
- Acted as a trusted partner to clients, supporting planning, sequencing, and execution of transformation roadmaps while navigating vendor and partner dependencies.

Outcomes and Impact

- Improved delivery predictability and stakeholder confidence by strengthening prioritisation, dependency visibility, and risk management, reducing late delivery surprises across complex, multi stream programs in highly regulated and public sector environments.
- Helped establish scalable delivery models that supported ongoing platform and capability evolution, reducing reliance on one off project delivery and enabling more sustainable long term outcomes.

Delivery Consultant - National Australia Bank (NAB) | Oct 2017 to Jul 2021

Senior delivery role within cybersecurity environment, leading engineering teams through complex cloud and compliance initiatives. Worked in highly regulated contexts, balancing delivery momentum with risk management, security, and operational stability.

Leadership & Delivery

- Led cross functional engineering teams to design and deliver a continuous compliance framework across AWS and Azure, improving control coverage, audit readiness, and operational confidence.
- Owned delivery planning and execution across security and platform initiatives, managing risks, dependencies, and delivery commitments end to end.
- Worked closely with senior technology and security stakeholders to align delivery outcomes with regulatory, risk, and business priorities.
- Embedded practical delivery and engineering ways of working that improved transparency, execution discipline, and team accountability.
- Built and shaped a business analysis capability within a cybersecurity domain, improving clarity of requirements, sequencing of work, and stakeholder alignment.
- Supported team members through coaching and development, helping build capability, engagement, and sustained performance.

Outcomes and Impact

- Established scalable, repeatable compliance practices across cloud platforms, improving audit readiness and reducing manual effort in a complex enterprise environment.
- Increased delivery confidence and stakeholder trust across security and risk sensitive initiatives by improving clarity of requirements, sequencing of work, and delivery commitments.

Technical Business Analyst – WBP Group | Jun 2014 to Sept 2017

Business and Systems Analyst – Sopra Steria | May 2011 to Mar 2014

Test Analyst – Aon | Feb 2010 to Apr 2011

Summary of Early Career Impact

- Built early career foundations across delivery, business analysis, and quality engineering.
- Supported technology initiatives in financial services and professional services.
- Progressed into broader delivery and leadership responsibilities through consistent performance and collaboration.

SKILL SET

Delivery and engineering leadership, End to end delivery accountability, Program and work stream ownership, Stakeholder and executive engagement, Product and delivery roadmap alignment, Cloud and security aware delivery, Modern data platforms and pipelines, Platform modernisation and transformation, Cross functional team leadership, Coaching, mentoring, and capability uplift, Continuous improvement and flow optimisation

EDUCATION AND CERTIFICATIONS

- Graduate certificate in Product Management (2022), Master of Business Administration in Project management (2014), Bachelor's Degree with a major in Computing (2009)
- Azure Fundamentals, Google Digital Cloud Leader, AWS Certified Cloud Practitioner, Certified Scrum master
