

DATA CONSULTING SERVICES

Company Vision & Services

Unlocking the power of data for every organisation

The Problem We Solve

Organisations today face critical data challenges that hold back growth and innovation.

Fragmented Data

Data locked in silos across legacy systems, spreadsheets, and disconnected databases.

Migration Complexity

Moving to the cloud is risky, slow, and expensive without the right expertise.

No Actionable Insights

Data exists but leaders can't get timely dashboards, reports, or answers.

AI & LLM Readiness

Organisations want AI-powered insights but lack the data foundation to build on.

Our Service Offerings

Data Migration

End-to-end migration from legacy systems to modern cloud platforms with zero data loss.

Data Platform Setup

Build scalable platforms using Snowflake, Databricks, or cloud-native services (AWS, Azure, GCP).

Visualisation & BI

Deploy Power BI, Fabric, and custom dashboards so teams can self-serve insights.

AI / LLM Integration

Train and deploy LLMs on your data platform for executive insights and user-facing intelligence.

Application Data APIs

Expose data platform to internal and external applications via secure, managed APIs.

Data Monetisation

Help organisations create new revenue streams by packaging and selling data products.

The Ideal Data Platform Architecture

How Snowflake, Databricks & cloud services work together

Cloud Infrastructure: AWS | Microsoft Azure | Google Cloud Platform

Data Migration - Our Proven Approach

01

Discover & Assess

Audit existing data sources, quality, dependencies, and compliance requirements.

02

Architecture Design

Design target platform, schema mapping, ETL pipelines, and data governance model.

03

Build & Transform

Develop ingestion pipelines, transform data, and implement quality checks.

04

Validate & Test

Run parallel environments, reconcile data, and validate with stakeholders.

05

Cutover & Optimise

Execute production cutover, monitor performance, and optimise for cost.

Key Principles: Zero Data Loss • Minimal Downtime • Full Traceability • Cloud-Native First

Visualisation & AI - Unlocking Value

Business Intelligence & Dashboards

- ✓ Power BI & Microsoft Fabric deployment
- ✓ Self-service dashboards for every team
- ✓ Real-time KPIs and automated reporting
- ✓ Data storytelling and executive summaries
- ✓ Embedded analytics in existing applications

AI & LLM-Powered Intelligence

- ★ LLMs trained on your organisation's data
- ★ Natural language queries for executives
- ★ Automated insights and anomaly detection
- ★ AI assistants for internal teams
- ★ Secure, governed, private AI deployment

Data as a Product – New Revenue Streams

Your Data Platform

Internal Apps

Consume data via
secure APIs

Customer-Facing

Apps powered by
your data

Data Marketplace

Sell curated data
to partners

Analytics Products

Packaged insights
as a service

Commercial Model

How the consulting company will generate revenue

Project-Based

- ✓ Fixed-scope engagements
- ✓ Data migration projects
- ✓ Platform build-outs
- ✓ Milestone-based billing

Retainer / Managed

- ✓ Ongoing platform support
- ✓ Monthly managed services
- ✓ SLA-backed operations
- ✓ Continuous optimisation

Advisory & Training

- ✓ Strategic data consulting
- ✓ Team upskilling workshops
- ✓ Architecture reviews
- ✓ Roadmap development

Revenue mix ensures recurring income alongside project-based growth.

Why This Opportunity Exists

Massive Market Demand

Every mid-to-large organisation is modernising their data stack. Demand for skilled consulting far outstrips supply.

IT + Data Gap

IT teams build infrastructure but rarely have deep data platform, analytics, or AI expertise — that's the gap we fill.

Speed to Value

Pre-built frameworks and proven methodologies let us deliver in weeks, not months. Clients see ROI fast.

Recurring Revenue Potential

Initial platform builds lead to ongoing managed services, training, and expansion — creating predictable income.

Thank You For Your Guidance

Where I'd Value Your Input

- Refining the service offering & positioning
- Go-to-market strategy & client acquisition
- Commercial model & pricing approach
- Building the right team & operations
